SUMMARY

B.Tech Cyber Security student who builds and ships real, deployed security tools and full-stack web applications. Hands-on with network monitoring, threat detection, and modern web stacks. Seeking a fresher / entry-level cybersecurity or full-stack role in Japan, and actively preparing for it (Japanese language study, visa pathway research).

EDUCATION

B.Tech, Computer Science & Engineering (Cyber Security)
[St. Vincent Pallotti College of Engineering & Technology \(Autonomous\), Nagpur](#)

- Coursework: Network Security, Ethical Hacking, Cryptography, Programming Languages
- Building security tools and full-stack projects independently alongside coursework

2024 — Present

PROJECTS

Network Security Dashboard
[Python](#) · [React](#) · [Flask](#) · [SQLite](#) · [AbuseIPDB API](#) · [WebSockets](#)

- Real-time traffic dashboard streaming over WebSockets, refreshing every 2 seconds
- IP reputation lookups via AbuseIPDB (country, abuse score, reports) and a 13-port scanner with automated Gmail alerts + cooldown logic
- Threats persisted to SQLite; backend on Render, frontend on Vercel. Live demo + open source

2025

Nexus — Social Community Platform
[Next.js 14](#) · [TypeScript](#) · [PostgreSQL](#) · [Prisma](#) · [Supabase](#) · [Redis](#)

- Full-stack social platform: OAuth (GitHub + Google), real-time feed, interest-based communities, direct messaging
- AI assistant via Claude API, WebSocket streaming, Cloudinary media storage, profile analytics

2025

Malware Scanner & PhishingShield
[Python](#)

- Malware Scanner: detects malicious file patterns/signatures for file-level threat analysis
- PhishingShield: analyzes URLs with pattern recognition + heuristics to flag phishing attempts
